The *Global Strategy for Women's, Children's and Adolescents' Health 2016-2030* set an ambitious agenda for ensuring that women, children and adolescents survive, thrive, and transform, in alignment with the Sustainable Development Goals. In this emerging SDG era, how will we hold each other — and ourselves, and all stakeholders — accountable for fulfilling our commitments to women, adolescents and children? How will we measure our successes, and monitor the gaps that need more work? How will we

come together around common priorities? How must we change our way of doing business to make sure that no one is left behind?

Please join us again this year, as the UN General Assembly comes together in New York, for a morning of dialogue, discussion, and data, featuring new findings and recommendations from:

- The Unified Accountability Framework for the *Global Strategy*
- *Global Strategy* Monitoring Readiness Report
- Countdown to 2030, and the Countdown to 2015 Country Case Studies
- The 2016 report of the Independent Accountability Panel 'Old Challenges, New Hopes: Accountability for the Global Strategy for Women's, Children's and Adolescents' Health'
