

Tanzania Countdown Country Collaboration

Analysis workshop
IHI, Dar es Salaam
26-27 September 2022

Tanzania Countdown collaboration: outputs 2020-22

- M&E support to Ministry
 - Contributions to analytical report midterm review HSSP IV (late 2019) and endline review HSSP IV (2022);
 - M&E plan HSSP V, including RMNCAH and nutrition plan
 - Analysis and key estimates for indicators 2017-2021 (Nairobi workshop)
- Research studies
 - Covid 19 impact on the continuation of health services analysis for 2020
 - Maternal quality of care in health facilities
 - Dar es Salaam city and MNCH: general report, paper draft

Agenda 2023-2025: multi-country analysis projects

- **Maternal and newborn health strategies:** analysis of survey, DHIS2 (delivery volumes), facility assessments to assess different strategies to improve MNH; phase I basic analysis, phase II linking of data sets
- **Immunization coverage and equity:** assessment of subnational coverage levels, trends and inequalities, using surveys, facility data and other admin data – collaboration with GAVI and WHO
- **Family planning coverage and equity:** analysis of all data sources, multiple types of surveys, facility data, admin data, to estimate coverage levels, trends and inequalities – collaboration with Track20, PMA2020

Agenda 2023-2025: Tanzania further priorities

- **Support analyses for MOH in context of HSSP V monitoring**

- Council profiles and statistics; including performance measures for regions and mainland; this will also involve health system data such as financing and health workforce (inputs) as well as coverage outputs
- Further analyses may geo-spatial modeling to obtain council level estimates to improve facility-based statistics
- Any other issues requested by MOH (e.g., trend analyses to assess impact Covid19)

- **In-depth research studies (potential)**

- adolescent health (mortality, maternity services, family planning, post abortion care, nutrition)

- **GFF investment case-related subject areas**

- Any priorities emanating from the ongoing mission of the GFF/WB team

Data developments 2022-2025

- Census just completed in 2022 – reports forthcoming, includes household deaths in the last 12 months
 - Critical data for population projections
 - Possible mortality estimates (maternal, child, adult) depending on data quality
- TDHS just completed 2022 – preliminary report expected soon;
 - will provide critical data for evaluating DHIS2 based estimates of coverage
 - New mortality data for subnational trends
- DHIS2: further expansion, changes
 - Focus on council level data
- Health system data: financing, HRHIS
- Other studies – vital statistics (RITU, HDSS / SRS)

Collaboration core team (preliminary)

- IHI: Honorati Masanja (lead), Josephine Shabani, Jacqueline Minja, Peter Binyaruka
- MOH: Habib Ismail, Maro Chacha, Ephrahim Magafu, Mwendwa Mwenesi
 - Senior staff for guidance: Catherine Joachim, Claud John Kumalija, Dr Ahmad Makuwani
- GFF: Georgina Msemo
- Other Tanzania: Masoud H. Mahundi (U Dar es Salaam), Daudi Simba (MUHAS), Sophia Kagoye (NIMR)
- Global: Claudia Hanson (LSHTM), Ties Boerma (U Manitoba)
